

MONMOUTH COLLEGE TRANSFER INFORMATION & ADVISING HIGHLIGHTS 2020-2021

Transfer Admission & Application Requirements:

- Minimum of 12 transfer credit hours required to be considered a transfer student. Students with fewer than 12 hours should apply as a first-year freshman.
- Official transcripts from each college and university attended

Transfer of Credit:

- Courses with D or better may be transferred
- Maximum of 64 credit hours accepted
- Students who complete an Associate in Art, Science, or Fine Arts will transfer at junior standing
- Transfer guides available online at monmouthcollege.edu/transfer
- Illinois Articulation Initiative (IAI) receiving only institution

Scholarship & Financial Assistance Opportunities:

- Dean's Scholarship: range up to \$22,000
- Phi Theta Kappa Scholarship: up to \$2,000
- Wallace Founders Scholarship: Full tuition scholarship; minimum 3.2 GPA required to apply. Application, essay, and interview required.
- Fine Arts and Special Interest Scholarships are available by audition/interview to majors and non-majors.

Transfer Students Are Encouraged To:

- Meet with a faculty advisor individually to discuss transfer of credits and a degree completion plan
- Apply at least three months prior to planned enrollment
- Work closely with our transfer coordinator, Wendy, to ensure courses will transfer

Monmouth College Campus Highlights:

Updated Website & Transfer Guides: Monmouth launched a new website and updated transfer guides at monmouthcollege.edu/transfer in September 2020. Transfer guides for each community college are being updated and added to the website. Check back often for additions.

Transfer Policies: Monmouth is recognized as a receiving-only institution in the Illinois Articulation Initiative (IAI). Students may transfer up to 64 credit hours, courses with a D or higher may be transferred, and junior standing is offered to students transferring with an A.A. or A.S. degree.

Application & Deadlines: February 15 is the priority scholarship deadline for fall transfer applicants. In addition, August 1 is the regular decision deadline for fall applicants. For students applying for the spring semester, January 1 is the application deadline.

Expanded STEM Programs: In fall 2019, Monmouth implemented 3 new majors in STEM – data science, engineering and neuroscience. Engineering is a “renaissance program” that offers concentrations in chemical, electrical, and mechanical engineering.

Center for Science & Business: Our newest academic building is home to some of our more popular majors for transfer students, Business Administration, Psychology, Biology and Exercise Science, and our newest majors in data science, neuroscience, and engineering. This \$42 million center was completed in 2013 and continues to facilitate discussion and collaboration across disciplines. The center features 14 research labs, including high-performance parallel computing, nuclear physics, nutrition, ecology, psychology, and anatomy. It also includes tax preparation rooms, an astronomical observatory, a cadaver lab, a computer numerical control (CNC) machine, and a greenhouse. The Trubeck Telescope, a recent addition, can gather about 10,000 times more light than an unaided human eye and allows students and faculty to observe stars and galaxies that are trillion of miles away.
